

The International Development Studies Interdisciplinary Graduate Program is a 12-credit program that exposes students to a variety of approaches and practices to international development. Students take a common course to learn theory, assumptions and values, applications, and the impact of development. Electives challenge students to examine development practices from disciplinary perspectives outside of their primary department and enhance problems solving and critical thinking skills. A completed check sheet is required for graduation. For more information, please contact Karen.Gardenier@colostate.edu.
